

HWA 3: Simplicity and style

Designed not to be intrusive, the HWA 3 easily fits into any décor. When it's time for a break, we know that the hot water is the star of the show and the HWA 3 delivers this quickly at the desired temperature, time after time.

Easy, reliable and flexible

The HWA 3 builds on the success of the popular predecessor, the HWA 20.

We have maintained the same principles that make our hot water range so reliable but added tried and trusted features from our other products. Now you have additional practical features such as digital control, one touch boil mode, shutdown timer and fill configuration.

Flexibility

The HWA 3 can be used as automatic and manual fill and this is a setting that can be changed anytime. You simply press a few buttons and after a minute you have set up the machine to its alternate operation.

Digital control

The easy to use control allows you to set the holding water temperature. For black tea you'll want 90-95°C but instant beverages around 86°C is ideal.

The HWA 3 allows free flow dispense with a tap height of 155mm (with drip tray) - 190mm (without drip tray).

Built with maintenance in mind

Designed to be easy to maintain, all surfaces have been manufactured to be resistant to scale build up. This is important if you find yourself in a hard water area or if you cannot use filtered water. Every part of the HWA 3 has been made simple to clean and when required, descale.

Bravilor Bonamat recommends the use of Renegite descaler and the use of a water filter.
